

Supporting Science's Next Generation

ARCS Scholar **Katja Kasimatis**
UO, Institute of Ecology and Evolution

- **How do we meet the challenge of advancing science in America?**
- **What drives the scientific discoveries that propel social and economic growth on a micro and macro level?**
- **How do we contribute in a global arena?**

The answers to these key questions are the PhD candidates who launch their research with passion, vision, and determination, ready to do the benchwork upon which groundbreaking science is built.

With the majority of research scientists over the age of 40 and the pipeline for the next generation of American scientists slowing, ARCS Oregon advances scientific achievement by enabling internationally recognized programs at Oregon Health & Science University, Oregon State University, and the University of Oregon to recruit and retain the most gifted graduate scholars.

Achievement Rewards for College Scientists (ARCS) Foundation Oregon supports these young researchers with unrestricted scholar awards. Removing financial barriers to study leaves these graduate students free to focus on what matters most: their world-class research and contributions to global progress.

By helping Oregon universities to recruit and retain top graduate students, ARCS Oregon is investing in American science and innovation, and in Oregon's future prosperity.
