

WHO WE ARE

ARCS Foundation (Achievement Rewards for College Scientists), is a private organization conceived and run entirely by philanthropic women to address this country's most critical competitiveness issue – the serious shortage of American scientists and engineers. Since our founding in 1958 by a few women in Los Angeles, ARCS Foundation has grown to 17 chapters nationally and invested more than \$87 million in the innovation potential of almost 9,000 of the most outstanding American scholars in science, engineering and medical research at 54 of the country's top research universities.

We are very proud of what ARCS Foundation has accomplished as a grass roots group with a very small budget. The Portland Chapter was founded in 2004, and since that time we have raised over \$2 million to sponsor 130 graduate students working to complete PhDs at OHSU and Oregon State University. We know our mission is important to our country's economic recovery, our global technological leadership and ultimately the well-being and the quality of life for all people.
